Install Layered Navigation Ajax by OCMod

First, copy source code into project normally.

Second, please reference all js/css files to header.tpl and after line:

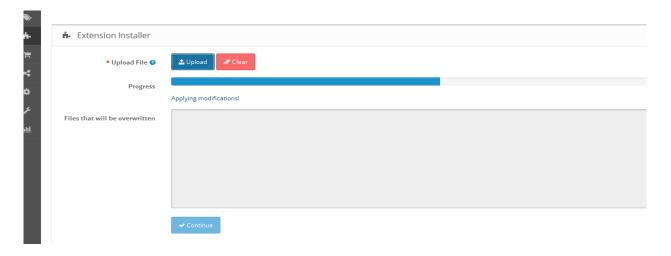

```
<script src="catalog/view/javascript/jquery/jquery-2.1.1.min.js"
type="text/javascript"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script>
```

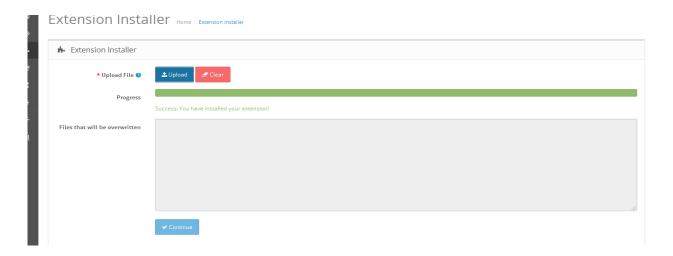

like:

```
<script src="catalog/view/javascript/jquery/jquery-2.1.1.min.js"
type="text/javascript"></script>
<script src="catalog/view/javascript/jquery/jquery-ui.js" type="text/javascript"></script>
k href="catalog/view/javascript/jquery/css/jquery-ui.css" rel="stylesheet" media="screen"/>
k href="catalog/view/javascript/jquery/css/jquery-ui.css" rel="stylesheet" media="screen"/>
k href="catalog/view/theme/default/stylesheet/opentheme/oclayerednavigation/css/oclayerednavigation.css"
rel="stylesheet">
<script src="catalog/view/javascript/opentheme/oclayerednavigation/oclayerednavigation.js"
type="text/javascript"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></scri
```

After copy source code and reference js/css file, please enable module and we have to install module modification by OCMod to modify the core file.

Go to Extension Installer -> Upload -> Choose 'oclayerednavigation.ocmod.xml' (in module folder)

After install successfully, go to Modifications -> Choose Modification item -> Click Refresh Icon at right-top links.
